

LABELS THAT STICK & STAY STUCK

RHINO labels are as exceptional as the RHINO 6000. Easy to use and super-strong, they're designed for the long haul. Thanks to industrial-strength adhesives, they deliver the lasting durability and legibility you demand – in six materials, for a multitude of applications. To meet your high standards, RHINO labels are designed to work exclusively with our printers and perform on any surface you encounter.

- Easy-to-peel, split-back styles will speed you along.
- Industrial-strength adhesives help these labels stick and stay stuck – in harsh worksite conditions.
- Thermal transfer print technology produces labels that are durable, smear-proof and resistant to chemicals, solvents, heat, UV and more.

NEW! RHINO self-laminating labels protect your printed area from exposure (to oil, solvents, water and abrasion). Ideal for wire and cable identification, these versatile labels offer excellent conformity to round, irregular and flexible surfaces:

- Specially-formulated to stick and last – on wire and cable
- Resistant to abrasion, chemicals and moisture
- Die-cut labels allow easy "peel away" from liner
